

What on Earth is the Va j-j Visor?

The Va j-j Visor is a revolutionary, patent pending, disposable shield designed to help protect a woman's inner vulva area (inner labia, clitoris, and vaginal opening). The Va j-j Visor is soft and flexible and will naturally fit to the shape of your body, while your body's natural muscular tension holds it effortlessly in place.

When do I use the Va j-j Visor?

Hair Removal/Hair Coloring: The Va j-j Visor allows you to remove more hair “down there” than you ever thought possible (or perhaps than you ever knew existed!) by protecting your most sensitive skin from depilatory creams, hot wax, razors, and scissors, as well as during laser and

electrolysis treatments. With Va j-j Visor you'll have no more worries about chemicals, burns, nicks, or cuts. It also provides protection during hair coloring “down there.”

Tanning: The Va j-j Visor covers your most delicate skin, assisting in protection from UV rays and labia darkening while tanning. It also shields the inner vulva during spray tanning.

Other Uses: The Va j-j Visor helps provide hygienic protection while trying on swimwear and intimate apparel, and provides coverage and privacy during body piercing and tattooing.

Instructions:

1. Wash your hands and remove the Va j-j Visor from the sealed wrapper.
2. Hold the Va j-j Visor from the bottom with the grooved handle between your thumb and forefinger. The flat tail should be towards the back and the wider, deeper cup in the front.
3. Raise one leg or squat slightly and spread the outer labia with your fingers. Fit the Va j-j Visor gently in place over your inner labia/clitoris and vaginal opening and fold your outer labia over the Va j-j Visor. It's that easy!
4. The Va j-j Visor should be comfortable if properly positioned. If it isn't, gently pull the Va j-j Visor away from your body and try again.
5. The Va j-j Visor must feel secure prior to application of depilatory creams, waxes, or lotions. Piercings in this area may prevent a secure fit.
6. To create a more powerful seal, spread personal lubricant around the upper inside of the Va j-j Visor. Saliva can be used in what we like to call the “lick it and stick it” method. Once the Va j-j Visor is properly fitted, lightly pinch the sides inward to create a suctioned fit.
7. ALL creams, lotions, and waxes MUST BE removed prior to removing the Va j-j Visor.
8. When you're done using the Va j-j Visor, dispose of it by placing in waste basket or recycle bin. DO NOT FLUSH.

Not intended for internal use. Use only as directed.
